| Average District Size, Total District Seats & average number of District Seats | | 295,843 | 166 | 9.76 |
| **20% Adjustment Seats**, selected from runners up in each party in district races, by their score. | | | 33 | |
| District seats are based on the now outdated 2010 census. Numbers will change based on 2020 census. | | | | |
| All these numbers need refinement. Unincorporated & small towns are guesstimates. | | | | |
| Totals are approximate. Cities like Aurora overlap multiple counties. About 175,000 people statewide not accounted for. | | | | |
| 2010 US Census | | 5,029,325 | 199 | 25,273 |
| 2017 Est. Census | | 5,607,154 | 199 | 28,177 |
| | | | | |
| Voters would use Range (Score) voting on as many candidates as voter wants. | | | | |
| (2) votes per elector, Above the Line (Party), Below the Line (candidates) Mix & Match. | | | | |
| 2% party threshold. Every 2% demographic slice in the state is represented. | | | | |
| Blows up Gerrymandering and the Spoiler Effect, makes gerrymandering and spoilers impossible. | | | | |
| Every vote in every district counts. No wasted votes. People can vote however they want. | | | | |
| Rural Districts have fewer people, fewer reps. | | | | |
| Denver, El Paso & Jefferson have more than ave, more reps. | | | | |
| Retains District representation, adds the full spectrum of diversity within each district. | | | | |
| Adjustment seat produce accurate representation of parties. Input always matches output. | | | | |
| Vacancies can be filled by adjustment seat method, saving costs of elections, preserves party continuity, voter intent. | | | | |
| Should yield 8 - 9 parties, easy candidate ballot access, lots of choice for voters. | | | | |
| Reduces the effects of targeted dark money campaign spending in swing districts. | | | | |
| Introduces party and candidate accountability. | | | | |
| Will make Colorado the #1 democracy in the United States, best gov. & electoral systems. Introduce democracy to US. | | | | |
